

Terje (Ted) Hansen **Director – Geological Projects**

Ted has over 40 years' experience in the exploration and mining industry, with 20 years in senior technical and management roles at gold mining operations in Australia. The last 14 years with Cube have involved consulting in a variety of commodities to exploration and mining operations in Australia and overseas.

During his career, Ted has been involved in all technical aspects of exploration, resource definition and mining as well as corporate strategic planning and management.

Ted has an ability to combine practical geology with input from other mining disciplines such as process metallurgy and production to then evolve realistic solutions to operational issues. This experience, combined with his strong communication skills, establishes him as a valuable contributor to any project.
