

CUBE CONSULTING

Wira Pahlawan

Senior Mining Engineer

Wira Pahlawan is an Australian Registered Mining Engineer with more than 10 years' experience in the mining industry, including greenfields and mine expansion projects. Wira has experience in a wide variety of commodity and deposit types, including iron ore, coal, gold and copper. He has worked in mining technology, mining companies and for mine contractors, performing a variety of mine planning roles.

During Wira's time at the Grasberg mine, he developed the "mine to mill" model that allowed balance in feeding and tonnage sensitivity. He also succeeded in set up mine scheduling models in several projects. Wira was a team member of the Jimblebar success story, which including mine start up one year ahead of schedule.

Wira have had previous success in project delivery and at Cube Consulting he's looking to work on a range of exciting and challenging clients projects..
