

CUBE CONSULTING

Brian Fitzpatrick

Principal Consultant

Brian has worked in the mining and exploration industry for over 30 years. He is a member of the AusIMM with CP accreditation. He has a broad range of skills developed from his career as a geologist in open pit and underground mining and near-mine exploration, working with a variety of deposits within Australia. Brian is highly experienced in Archaean gold mineralisation styles and extraction techniques for both open pit and underground mining.

He is an expert user of Vulcan and Surpac and is highly skilled with mine geology and grade control processes, reconciliation, geological interpretation, resource modelling and estimation.

Since joining the Cube team in 2012, Brian has applied his industry experience helping clients with all aspects of mining activities and evaluation
