## Rindra Le Grange

Consultant Geologist

Rindra has 15 years of experience in the mining and exploration industry. She started her career in South Africa where she worked on a number of large multi-million ounce platinum projects on the Northern limb of the Bushveld Complex for various mining companies including Ivanhoe Mines, Lonmin PLC and Afriore. She was part of a team that proved up over 30 million ounces of platinum, palladium and gold in 18 months. During this time, she acquired numerous skills such as sampling and QA-QC, database management, 3D geological modelling and resource definition.

Rindra is highly proficient in the use of Surpac 3D modelling software and spent two years as a product specialist working for Gemcom Software Australia. Subsequent to this, she spent six years working on various exploration projects both in Western and South Australia. As the Principal Resource Geologist, she was responsible for producing various resources for orogenic Archean gold, epithermal gold, skarn magnetite and tin. Her experience includes maiden greenfield resources, updating historical/existing resources, JORC 2012 reporting and mineral resource used in feasibility studies.

Rindra's strong technical and software expertise and her practical approach to solving problems adds value to any project.
