

# CUBE CONSULTING

---

## Tamar Piñero

Senior Grade Control Geologist

Tamar is a geologist with 13 years of industry experience in mine operations and exploration. She has solid experience in mine geology, particularly grade control (both open pit and underground) and has experience in various mineralisation styles such as porphyry copper-gold, narrow vein lode gold, polymetallic VMS, and lateritic nickel.

Tamar acquired numerous skills working as a Senior Mine and Project Geologist across Australia, New Zealand and the Philippines and has been responsible for grade control, QAQC, database management, reconciliation, grade control estimation and resource definition.

She is an expert user of Surpac, Leapfrog, Minesight, and acQuire software.
