## Mitch Rohr

Principal Mining Engineer

Mitch Rohr is a Principal Mining Engineer with over ten years' experience, predominantly in operational site-based roles, ranging from production through to Life-of-Mine planning and operations management.

Mitch is experienced in both mine design and mine scheduling for complex hydrometallurgical and multi-element operations. This experience includes JORC Competent Person (CP) sign-off for nickel laterite Ore Reserves. Mitch has also worked in a corporate capacity advising on project studies for deposits around the world.

Mitch has recently completed the AusIMM Cost Estimation course to improve his knowledge of project studies.

Mitch believes the key to delivering top quality work lies in good communication, attention to detail and a collaborative and creative approach to problem solving.
