

CUBE CONSULTING

Mitch Rohr

Principal Mining Engineer

Mitch is a motivated, experienced and capable Principal Mining Engineer and Study Manager with significant experience in site-based technical and leadership roles. Mitch has worked in all facets of an operating mining environment, from short-range mine production through to Life-of-Mine planning and operations management. In addition to this, Mitch has accumulated substantial study and advisory experience since moving into the consulting space, having advised on project studies for deposits around the world.

Mitch is particularly experienced in both mine design and mine scheduling for complex hydrometallurgical and multi-element operations. This experience includes JORC Competent Person (CP) sign-off for iron ore, laterite nickel, copper sulphide and gold Ore Reserves.

Mitch believes the key to delivering top quality work lies in consistent and clear communication with clients, attention to detail and a collaborative and creative approach to problem solving.
