## Corey Freeman

Principal Mining Engineer

Corey Freeman is a Principal Mining Engineer with 25 years' experience in operational, mine planning and technical roles across owner-operator, contractor and consultancy companies in Australia and internationally. With a focus predominantly on underground mining, Corey has had experience with a variety of mining methodologies across varying mineral deposits. He combines this experience with a well-developed understanding of the commercial, functional and safety management aspects of mining operations to deliver a well-rounded view of any mining scenario.

Corey has direct operating experience in all aspects of contract tendering and contract management, equipment selection, ventilation, technical reporting, mine planning/scheduling, and ore reserve reporting and evaluation.

This broad operating experience base is coupled with significant experience in technical analysis, studies ranging from Scoping through to Definitive Feasibility, due diligence and independent technical reviews, where strong communication skills allow Corey to convey this experience effectively for the target audience.
